

Stay in Contact Throughout Your Facility

Mobility is essential to staying connected to your customers and your team. Mobility enables you to be as productive away from your desk as when you are at your desk. The ability to go anywhere and to do anything in your facility—while staying connected to your communication and messaging system—is a reality, thanks to Toshiba's powerful line of wireless and cordless telephones and soft phones. Access voice mail and your company operator anywhere in the building. Take advantage of all the system's advanced calling features almost anywhere you go within your facility, or anywhere the Internet takes you when you're out of the office.

Maximize the Value of Your Wireless LAN

Toshiba gives you the power to stay connected using wireless IP telephones and SoftIPT® soft phone clients that run on your laptops, tablet PCs, or PDAs via your wireless Local Area Network (WLAN). You can roam anywhere WLAN goes, or anywhere the Internet takes you, and maintain voice and data functionality.

Toshiba mobility solutions maximize the value of your WLAN by using your existing WLAN infrastructure. This makes very cost-effective mobility applications possible with Strata® CIX™ solutions.

Toshiba Cordless Digital Telephones

Toshiba gives you the ability to take full digital desk phone functionality with you, whether it's down the hall, into the conference room, or across campus. In fact, they are the only cordless telephones that allow you to access some of today's most advanced desk phone features, such as desk phone extension numbers, call forwarding, Caller ID and multi-line access.

You can even switch between your cordless and digital desk telephones during a call. And thanks to spread-spectrum and narrow band technologies, Toshiba Cordless Digital Telephones safeguard your phone's frequency range, plus deliver maximum security.

TOSHIBA

Leading Innovation >>>

Wireless Telephones

For mobility solutions requiring wider area coverage within the enterprise, Toshiba's relationship with Hitachi® and Polycom® (SpectraLink is now part of Polycom) provides wireless telephone features that are fully integrated with Toshiba Strata systems.

Wireless IP5000 Telephone

The Hitachi WIP5000E-A wireless IP telephone operates within your facility over your WLAN.

SpectraLink Wireless Telephones

Polycom offers a complete portfolio of SpectraLink Wireless Telephones for the workplace and is dedicated to meeting the communication needs of mobile workers.

SpectraLink Telephones operate within your facility's micro-cellular architecture or over your WLAN. You can leverage your existing investment by converging voice and data applications on the same WLAN.
