

## NOVA COMMUNICATIONS ANNOUNCES BREAKTHROUGH IN DATA PROTECTION

*Leader in the Technology Industry  
Protects Customers with Leading Edge  
Cloud-Based Disaster Recovery  
Program*

PLYMOUTH, MN — October 27, 2015 — Nova Communications, an industry leader in unified communications, announced today that the company has launched its cloud disaster recovery program in order to better protect customer data in event of natural disasters, power outages, employee errors or emergency situations.

Nearly every business, especially in recent years, has become so inextricably reliant upon their data in order to run their company. Simply put, data must be available to anyone who needs it and it must be available at the exact right time. Unfortunately, most companies still use an inferior form of data backup such as tape or external hard drives. Furthermore, lost or misplaced data creates unnecessary company downtime dragging operations to a screeching halt, which is out of the question for most of today's businesses.

With nearly everyone depending on a strong IT infrastructure, it's no wonder why businesses are scrambling to find the ideal form of data protection and backup. With plans ranging from manual disk backup to off-site backup to sophisticated cloud-based disaster recovery programs, the demand for this technology is clearly evident. The overarching goal of any disaster recovery program is to ensure that in the event of any natural disaster (earthquake, fire, flood, tornado) power outage or user error that a company's data remains undamaged

and is immediately retrievable. Nova Communications' cloud-based disaster recovery program, takes this technology one step further, in that it allows businesses to continue running smoothly, even during the midst of a disaster or employee error like deleting a crucial folder off the LAN. Essentially, for the first time, Nova Communications' customers can now shrug off a disaster, and continue running their business as normal.

Business owners have been quick to recognize the massive value associated with a disaster-proof business and the drastic reduction, if not elimination, of company downtime. This evolution in cloud-based disaster recovery has been heavily anticipated and Nova Communications is proud to be among the few organizations leading the charge for this powerful technology. They are actively deploying their cloud-based disaster recovery program in the offices of many of their customers, across a multitude of industries.

"At the end of the day, it's about keeping our customers protected," stated Pete Jones, Owner/President of Nova Communications. "When we can deliver a proactive, redundant, cloud-based program like this, we can keep our customers connected with their data so that they can keep running no matter what life throws at them. It's such an overwhelming competitive advantage to eliminate company downtime and we're absolutely thrilled to deliver this to our loyal customer base. We believe that by providing our customers with competitive advantages, it gives them a leg up in their industry. Perhaps

that's why we've been fortunate to continue growing over the years, because of our outlook on ensuring mutual success."
